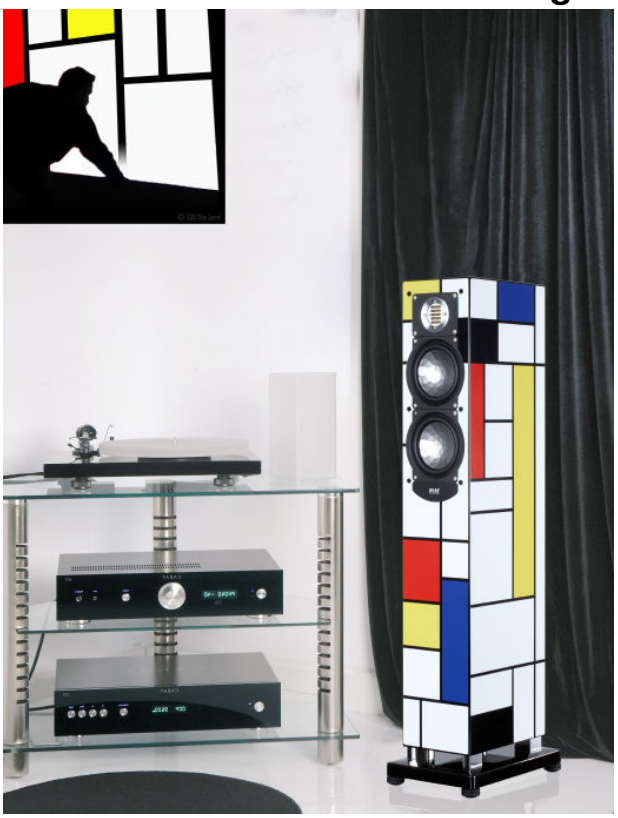
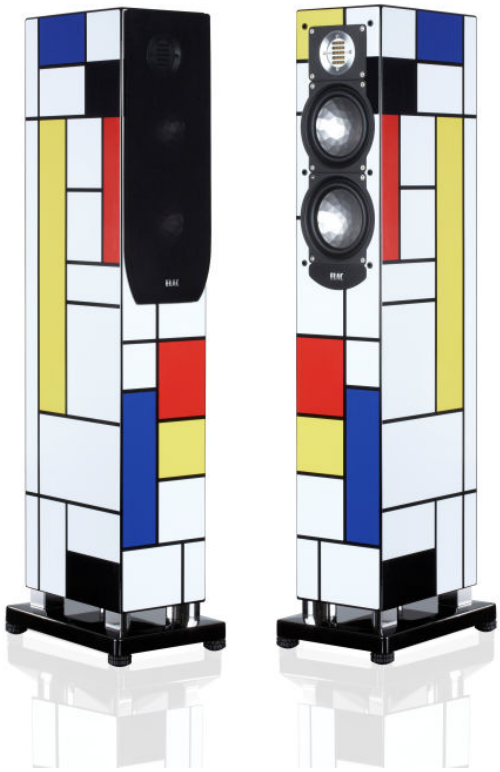
Colour and Non-Colour: Homage to De Stijl



De Stijl was a Dutch group of painters, architects and designers whose ideas have not just had an impact on the fine arts and architecture, but on furniture and industrial design as well. De Stijl artists pursued an aesthetic of geometric forms and colour simplicity. Their distinctive design principal was order and clarity. Their objective was to move past outmoded art styles and create a new, pure art with formal aesthetic pretensions.

In homage to the group around the painter Piet Mondrian ELAC is releasing a limited edition of their successful model FS 247 in the "De Stijl dress".

The foils are tissue-thin, UV-resistant and protect against scratches or water. The motif has been designed for the FS 247 and is very durable.



The motif is depicted in mirror images for the left and right loudspeaker.

Specifications FS 247

Dimensions Height (with/without base plate/spikes) Width (with/without base plate) Depth (with/without frame/base plate)	935/993/1021 170/220 270/285/320 mm	Crossover Frequeny	450/2500 Hz
Weight	16kg	Nominal Power Handling	120 W
Type		Peak Power Handling	160 W
Woofer	2 x 150 mm AS-XR cone	Frequency Range	30 - 50000 Hz
Midrange		Sensitivity	89 dB/2.8V/m
Tweeter	JET III	Nominal impedance	4 ohms
Rec. Amplifier Power at Nominal Impedance	30 – 250 W / Channel	Minimum impedance	3.4 ohms at 210 Hz
